## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-18	YES
	Claims		NO
Inventive step (IS)	Claims	1-18	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-18	YES
	Claims		NO

### 2. Citations and explanations

The devices according to claims 1-15 and the methods according to claims 16-18 are novel and inventive.

D1 (US-3,544,117-A) discloses the closest prior art, wherein a rotating tool is centrically clamped in a holding device. The centring is achieved in two steps, using a single measuring sensor.

The device according to claim 1 further comprises a computing arrangement and two measuring sensors, which are axially offset relative to each other and by means of which the tool can be more rapidly and simply centred in a single step.

The method according to claim 16 can be more rapidly and simply implemented than the centring method known from D1, owing to the use of two measuring sensors which are axially offset relative to each other.
